## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a transformer, classified in class 336, subclass 180.
- II. Claims 7-10, drawn to a three phase transformer, classified in class 336, subclass170.
- III. Claims 11-12, drawn to an electrical variable speed drive system, classified in class 318, subclass 656.
- IV. Claims 13-16, drawn to a method of transforming electricity, classified in class333, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a transformer not use in the three phase transformer of invention II, or the electrical variable speed drive system of invention III, or the method of invention IV; invention II has separate utility such as the three phase transformer not using a transformer of invention I, or use in the electrical variable speed drive system of invention III or the method of invention IV; invention III has separate utility such as the electrical variable speed drive system not using the transformer of invention I or the three phase transformer of invention III or the method invention IV; invention IV has separate utility such as the method not using the transformer of invention I, or the three phase transformer

Application/Control Number: 10/796,363 Page 3

Art Unit: 2832

of invention II or the electrical variable speed drive system of invention III. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Embodiment 1: figures 1-5;

- Embodiment 2: figure 6;

- Embodiment 3: figure 7;

- Embodiment 4: figure 8;

- Embodiment 5: figure 9;

- Embodiment 6: figure 10;

- Embodiment 7: figure 11; and

- Embodiment 8: figure 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of

claims to additional species which are written in dependent form or otherwise include all the

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP §

809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct,

applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996.

The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.
